

BASICEDU

Development of Model for Strengthening Competences of Disadvantaged Women through Basic Education

1st Newsletter

December 2021

BasicEdu, an Erasmus+ project, aims to enable more effective labour market integration of disadvantaged women & women in rural areas in the European Union.

Disadvantaged women are considered vulnerable because they face obstacles in order to enter the labour market due to their educational, vocational, and social background. To support their integration into employment, the main focus has to be on the identification, assessment and development of the skills and competences required by the labour market. However, the current review of labour market integration programmes has shown that the diversity in women's backgrounds is not really reflected and mostly follow a one-size-fits-all approach, while the gender aspect is also not considered systematically enough. Although disadvantaged women have particularly low employment and activity rates, no special attention has been paid on this topic so far, neither at European, nor at national level.

This project not only can help women embrace the European Union fundamental values but also develop their potential in the society they settle by promoting a close interaction between disadvantaged women, especially those living in rural areas. That will serve to ensure equality and social inclusion of disadvantaged women in a more ambitious way.

Our objectives

-  Empowering disadvantaged women and women living in rural areas enhancing their further professional opportunities and thus facilitating their access to the labour market.
-  Establishing mentoring and empowering relationships between disadvantaged women and opportunities in the local and regional fields.
-  Fostering the process of skills assessment of disadvantaged women and women in rural areas with a tailor-made methodology considering their specific needs.

Our products

The project will produce 3 Intellectual Outputs:

- ▶ The **BasicEdu Mentoring and Empowerment Programme** based on the results of the assessment methodology targets disadvantaged women through 5 training modules improving their key competences and women mentors through specific guidelines for mentoring and empowerment of disadvantaged women.
- ▶ The **BasicEdu Empowerment Activity Book** will contain inspiring successful stories and experiences created by the women who take part in the project, so it will be based on participating women to be role model in their communities.
- ▶ The **BasicEdu Gamified Online Learning Platform** for final beneficiaries working with disadvantaged women.

Our latest news

On the 18th and 19th of November, the partner organisations of the project went to Samsun (Turkey) to hold the first face-to-face meeting of BasicEdu, organised by Ondokuz Mayıs University as the project coordinator.

During the meeting, we were able to evaluate the work done so far, as well as lay the foundations for the activities to be carried out in the coming months, starting with the Mentoring and Empowerment Programme aimed at disadvantaged women and mentors. We can't wait to introduce you to the five modules we are preparing!
